ANNUAL REPORT 年報

OUR VISION

High quality healthcare for children in Asia, regardless of where they live.

OUR MISSION

Children's Medical Foundation (CMF) develops and implements sustainable healthcare solutions for children in Asia with a focus on helping underprivileged children.

THE UNMET NEED

The first 28 days of life - the neonatal period - is the most vulnerable time for a child's survival. Globally, 2.4 million children died in the first month of life in 2019 - approximately 6,700 neonatal deaths every day.¹ In Asia and China, due to disparity in medical care resources families do not have access to newborn healthcare when needed most.

CREATING LASTING IMPACT

Through medical education, infrastructure development and financial assistance, CMF stops preventable newborn deaths at the front lines. Our model, piloted and proven over a decade of experience, is sustainable and integrates into the public healthcare system. Building neonatal care resources supports national policy and United Nations Sustainable Development Goal 3, saving tens of thousands of newborns each year.

我們的願景

兒童醫健基金會致力於為亞洲兒童，無論其身 anywhere，提供優質的醫療服務。

我們的使命

兒童醫健基金會為亞洲兒童，尤其是弱勢兒童，開發並實施長期醫療救助項目。

未滿足的需求

誕生後28天的新生兒期 — 是兒童最脆弱的時期。2019年 全球共有240萬名兒童於出生後的第一個月內死亡 — 每天約有6,700 名新生兒死亡。¹ 在亞洲和中國，醫療資源存在很大差距，導致家庭在最需要時無法獲得新生兒醫療保健。

長遠影響

通過醫務培訓、設備捐贈以及資金援助等，兒童醫健基金會(CMF) 致力於避免可以預防的新生兒死亡。經過十多年的事實證明，這種措施可持續性地改善並融入了項目醫院的醫療保健系統。建立新生兒醫療保健資源以支持國家發展政策及聯合國可持續發展目標3 — 良好健康與福祉，每年可挽救無數新生兒的生命，讓每位新生兒都有機會健康成長。

A MESSAGE FROM CMF LEADERSHIP

In 2019, Children's Medical Foundation (CMF) continued with our quest to ensure that children are not deprived of healthcare needed for a healthy start to life.

2019 was a significant year, marking the completion of our flagship pilot, the Comprehensive Neonatal Healthcare Project, aimed to improve newborn medical care capability, where it was largely unavailable and causing preventable newborn death.

Impact evaluation for the program in Guizhou province, China, revealed it was an effective catalyst for neonatal healthcare development and ultimately improved equity and accessibility to newborn healthcare, saving thousands of children's lives each year.

Through medical education, seed funding for intensive care facilities, and the establishment of emergency and referral networks connecting tens of thousands of rural hospitals, the program attracted the attention of policy makers and was found to have made a major contribution to reducing newborn mortality.

However, a huge gap in skilled medical care remains for families living in rural areas. Consultation with government and medical advisors have led to an upgraded program, Every Baby Rescued (EBR), which launched this year, will scale to reach 50 million families by 2028.

We are incredibly grateful for the generosity and long-time support of partners and donors, and invite new friends to join us on our ambitious mission to ensure all families have equal access to medical care for their child when needed most.

We are extremely delighted to have played a role in spurring widespread improvement in neonatal critical care. Thank you for your unwavering support, allowing CMF to ensure every child is given a healthy and happy start to life.

理事會致辭

2019年，確保兒童不被剝奪健康生活所需的醫療保健是我們的追求。兒童醫健基金會將這份追求一直貫徹到底。

2019年是意義重大的一年，是我們的旗艦試點項目 – 新生兒綜合救治項目完成的里程碑，該項目旨在為新生兒醫療保健極度缺乏的偏遠地區提高新生兒醫療救治能力，以降低可預防的新生兒死亡。

該項目在中國貴州省的影響評估指出，這是新生兒醫療保健發展有效的催化劑，大大改善了新生兒醫療保健的公平性和可近性，每年挽救了數千名兒童的生命。

通過醫學教育、重症監護設施基建的種子基金以及建立連接數萬間偏遠地區醫院的急診和轉診網絡的各項項目，引起了相關決策者的關注並對醫健會降低新生兒死亡率作出的重大貢獻表示了肯定。

然而，生活在農村地區的家庭在醫療保健方面仍然存在巨大差距。醫健會與政府和醫療顧問的協商促成了一項升級計劃，「中西部新生兒救治能力建設」，該計劃於今年啟動，目標為 2028 年將受惠家庭擴展到 5000 萬個。

我們非常感謝合作夥伴和捐助者的慷慨和長期支持，同時也邀請新朋友加入我們的遠大的使命，以確保所有家庭在最需要的時候都能獲得優質和平等的醫療服務。

我們非常高興能夠在促進改善新生兒重症救治的方面發揮了關鍵作用。感謝大家對醫健會堅定的支持，讓我們能夠確保每個孩子都能夠健康快樂地開展他們的人生旅程。

MILESTONE YEAR IN 2019

FLAGSHIP PROGRAM COMPLETION

2019 was a landmark year, marking the completion of our flagship pilot, the Comprehensive Neonatal Healthcare Project. Commencing in 2010, the program developed neonatal care resources and addressed the preventable causes of death for babies in their first month of life.

The sustainable child health solution has 5 key components:

- (1) Neonatal Intensive Care Unit (NICU),
- (2) Neonatal Resuscitation & Emergency Baby Care(NRE),
- (3) Mobile Emergency Response Unit (MERU),
- (4) Save-A-Baby (SAB), and
- (5) National Neonatal Network (NNN).

The success of China government's Poverty Alleviation initiatives and funding from local NGOs have reduced demand and need for CMF's Save-A-Baby program, marking its closure. That said, due to the urgent need in specialized emergency baby transport, the MERU program was reinstated in 2018. Third party impact evaluation will be conducted after the completion of the final MERUs, to evaluate program outcome and impact.

Meanwhile, our sustainable programs continue to operate self-sufficiently without further donations. As a result, the network of 30 hospital NICUs treats five babies every hour!

According to impact evaluation conducted by Dr. Jiang Hong of Fudan University, the program directly:

- Spurred rapid development of hospital neonatal departments.
- Improved newborn resuscitation and newborn intensive care capability.
- Improved service accessibility and healthcare equity, through emergency referral and poverty relief.
- Reduced preventable newborn deaths ultimately reducing the Neonatal Mortality Rate in Guizhou, Sichuan, and Yunnan provinces.

2019年的成就

新生兒綜合救治項目

我們為CMF過去二十多年來取得的成就以及2019年產生的深遠影響感到自豪。CMF專注於實施新生兒綜合救治項目以降低新生兒可避免的死亡率。該項目包括五個分項目：

- (1) 新生兒重症監護室(NICU)
- (2) 新生兒復蘇培訓項目(NRE)
- (3) 新生兒轉診系統項目(MERU)
- (4) 貧困新生兒救助項目(SAB)
- (5) 全國新生兒網絡大會(NNN)

中國政府扶貧計劃的成功和當地非牟利組織的資助大大減低了社會對醫健會「貧困新生兒救助項目」的需求，標誌著該項目的結束。由於現時對嬰兒緊急運輸專門服務需求仍然非常急切，「新生兒轉診系統項目」於2018年恢復。而該項目完成後將會進行第三方影響評估，以評估項目的結果和影響力。

與此同時，我們的可持續項目繼續自給自足地運作，無需額外的捐款。現時，由 30 個NICU 組成的醫院網絡每小時可以為 5 個嬰兒提供治療！

根據復旦大學蔣紅博士的影響評估，該項目直接：

- 帶動了醫院新生兒科急速地發展。
- 提高新生兒復甦和新生兒重症監護能力。
- 通過緊急轉診和扶貧項目，改善服務可及性和醫療保健公平性。
- 減少可預防的新生兒死亡，降低貴州、四川和雲南省的新生兒死亡率。

PROGRAMS
COMPLETED

NEONATAL INTENSIVE CARE UNIT PROGRAM (NICU)

The journey for neonatal care resource transformation begins with this first program component, implemented for a rural region's most promising hospital. The hospital dedicates space for an newborn intensive care unit and over an 18-month period, 2 doctors and 2 nurses from the program hospital each receive 6 months of neonatal medical training at a national children's hospital. Meanwhile their team establishes or enhances the NICU at their home hospital with donated equipment, but mostly through hospital self-funded equipment and infrastructure. This hub for essential and intensive newborn care provides life-saving treatment for about 1,000 newborns each year and serves a community of 3 million. It becomes the catalyst for sustainable development of newborn care resources for the entire region.

COUNTY NEONATAL CARE UNIT PROGRAM (CNCU)

With support from the regional hub NICU, this program establishes a smaller scale intensive care unit for a city with 500,000 population. During the 12-month implementation, one doctor and one nurse receive 6 months of neonatal medical training at the provincial level training hospital. The combination of training, equipment and management protocol improvement ensure healthcare is accessible for families in remote areas and aligns with policies to establish newborn rescue centers in rural areas.

Like NICU, its mere existence provides the life-saving difference for babies born prematurely, with breathing or respiratory issues, infection or trauma at birth, addressing more than half of the causes of preventable newborn death. This new program component is in pilot phase.

新生兒重症監護室項目

該項目打破偏遠地區醫院新生兒治療技術發展的瓶頸，改善新生兒醫護服務，是每個項目醫院建立專業化的新生兒重症監護室並展開新生兒綜合救治的第一步。聯同當地實力最強的醫院進行合作，CMF會提供必需的臨床培訓和醫療設備，建立重症監護室，為周邊縣城的危重新生兒提供救治服務。該項目為期18個月，每家項目醫院2名醫生及2名護士趕赴上海或廣州的頂尖兒科醫院，接受為期6個月的強化培訓。結束培訓後CMF向選定醫院捐贈的呼吸機以及監護儀，將會幫助他們開展新生兒醫療服務，每個項目醫院每年都能救治超過一千名新生兒。項目醫院以及新生兒重症監護室是新生兒醫護的基礎組成部分。

縣級新生兒監護室項目

在該地區中心新生兒重症監護室的支持下，該項目為一個擁有 500,000 人口的小城市建立了一個特殊的嬰兒護理室。在為期十二個月的項目實施過程中，一位醫生和護士會在省級醫院接受了六個月的新生兒專科醫學培訓。培訓、設備和管理改進三大範疇相結合，以確保偏遠地區的家庭可以獲得醫療保健，亦符合在農村地區建立新生兒救治中心的政策。

這個項目的存在為因早產、呼吸困難、感染或創傷的早產嬰兒提供了挽救生命的，解決了一半以上可預防的新生兒死亡成因。這個新的項目組成部分現處於試點階段。

NEONATAL RESUSCITATION & EMERGENCY BABY CARE (NRE)

During this 2-year program, 6 medical staff from the Neonatal Intensive Care Unit train in emergency baby care and become Master Trainers in Neonatal Resuscitation Program (NRP) through the internationally recognized program from the American Academy Pediatrics. Using the Train-the-Trainer method and the Neonatal Intensive Care Unit hospital as their Center of Excellence, Master Trainers train a minimum of 120 front line medical professionals from at least 30 rural hospitals in the region. Through a series of training, reinforcement sessions and training equipment, CMF ensures that doctors and nurses are confident to apply what they have learnt in emergency situations.

In 2019, 39 doctors and 23 nurses from 60 rural hospitals were trained in neonatal resuscitation and emergency baby care.

新生兒復蘇培訓項目

在為期兩年的項目里，兒童醫健基金會的支持下，項目地區6名新生兒醫護人員接受為期一周的新生兒復蘇培訓，成為當地的師資。這6名培訓師回到項目醫院並以項目醫院為培訓基地，向該地區至少30所偏遠地區醫院的120名一線醫護人員提供培訓。通過一系列的培訓課程、進修課程以及配套設施（包括新生兒人體模型），CMF確保醫生和護士都能在緊急情況下專業地進行復蘇操作。

在2019年度共有來自60家偏遠地區醫院的39名醫生以及23名護士接受了新生兒復蘇以及緊急救治的培訓。

MOBILE EMERGENCY RESPONSE UNIT “BABY AMBULANCE” PROGRAM (MERU)

This 2-year program connects rural health facilities with the Neonatal Intensive Care Unit to provide medical support for newborns that cannot be properly treated in the rural setting. Through the donation of a transport incubator and mobile ventilator, sick newborns from county and township health facilities are safely transported when a trained neonatal intensive care team is dispatched from the Neonatal Care Intensive Unit hub to retrieve the ill newborn for advanced care. Through partnership with the government emergency rescue system, this program is cost efficient and sustainable. In 2019, 374 babies were transported to a CMF Neonatal Intensive Care Unit. As of 2019, a total 2,035 babies have been rescued by this program.

新生兒轉診系統項目

新生兒轉診系統項目是一個為期兩年的項目，它將偏遠地區醫療機構與新生兒重症監護室項目建立的新生兒重症監護室聯連系起來，使得無法在偏遠地區得到妥善醫治的寶寶能夠得到專業的救治。CMF向項目醫院捐贈新生兒專用轉運暖箱、呼吸機、心電監護儀，再輔以接受過培訓的新生兒重症監護醫療隊伍，就能將一名病重的新生兒從鄉鎮診所轉運到上級醫療機構，讓寶寶有機會接受更完善的治療。在2019年度共有374名寶寶通過新生兒轉診系統項目轉運到了CMF的新生兒重症監護室。截至2019年度共拯救了2,035名寶寶的生命。

SAVE-A-BABY PROGRAM

Once the improved care infrastructure is in place at the Neonatal Intensive Care Unit, financial assistance is available to families who may otherwise be unable to afford saving their newborn. During this 2-year program, at least 40 newborns from families living below the poverty line are saved by the doctors and nurses at the Neonatal Care Unit, giving each baby girl or boy the opportunity for a bright and healthy future.

In 2019, 19 babies were given a second chance at life through the SAB program.

貧困新生兒救助項目

當新生兒重症監護室項目的基礎設施建設完成的時候，CMF向無法承擔新生兒醫療費用的家庭提供經濟援助。在這個為期兩年的項目中，每個項目點至少可以救助40名貧困家庭的新生寶寶，讓每個寶寶都有機會健康成長。

在2019年度，共19名寶寶得到了經濟援助。

PROGRAM BENEFICIARY'S STORY

SUCCESSFUL CROSS-PROVINCE INFANT HOSPITAL TRANSFER THANKS TO MOBILE EMERGENCY RESPONSE UNIT PROGRAM

22th May 2019 9:00 am

That Friday morning, the neonatal ward of Xichang People's Hospital received another emergency phone call. A newborn from the Muli County People's Hospital born the day prior, was experiencing shortness of breath, was blueish purple and had difficulty breathing. The baby was in dire need of a ventilator for life support.

Situated in a poverty-stricken area, the medical staff at Muli could not provide the necessary treatment. Transfer to a better equipped hospital was essential for medical care. However, the two hospitals were 200 miles apart, and it would take 7-to-8 hours. Not only would the journey be lengthy, it would also be risky due to the rugged terrain in rural China. Therefore, to safeguard the infant's life, the two hospitals quickly facilitated the arrangement of the transfer, in spite of these unfavourable circumstances.

22th May 2019 9:35 am

Armed with a CMF donated neonatal incubator and ventilator, CMF emergency transport trained Dr. Zhang Ya and Head Nurse Zhou Longfen headed out to the midpoint place to intercept the newborn. After 3 hours, the 2 hospitals' vehicles came face to face in Yanyuan County at 12:35pm, executing a smooth exchange. However, the infant was still suffering severe symptoms such as cyanosis and vomiting. His breathing rate and oxygen saturation reached critical levels of over 100 times per minute and 50%, respectively, and baby exhibited signs of anxiety. Applying resuscitation, the medical staff eliminated the cyanosis. However, the situation was still critical and medical staff hastened their journey.

To minimize physical trauma to the infant in the incubator, the medical staff navigated the rugged roads of the rural areas cautiously and used an additional stabilizer. After a 3-hour drive, at 4:04pm, the infant arrived at Xichang People's Hospital safely, and immediately began advanced treatment. The transfer proved challenging for the Xichang People's Hospital. Firstly, such a lengthy journey was unprecedented. It was only thanks to the generous donation of the mobile neonatal unit by Children's Medical Foundation's donors that the transfer succeeded. Not only did CMF provide the infant with superior neonatal care, CMF raised Xichang People's Hospital's ability to rescue infants in remote areas.

項目受益人故事

成功院外轉運危重新生兒（新生兒轉診系統項目）

2019年5月22日上午9時，一個特殊的電話打到西昌市人民醫院新生兒科病房，木里縣人民醫院有一個生後1天的早期新生兒出現氣促、青紫、呼吸困難，需要呼吸機治療，但當地條件有限，急需緊急援助。當地兒科醫務人員對患兒進行準確的病情評估，確認患兒目前有轉運指針。但是兩院相隔200多公里，車程約7-8小時，崎嶇的山路極不利於轉運的開展。為了盡快搶救該名患兒，兩院達成了共同轉運、途中交接的轉運方案。

上午9時35分，我院兒科新生兒病區張婭主治醫生和周龍芬主管護師攜帶由CMF捐贈的新生兒轉運系統出發。該系統涵蓋新生兒暖箱、新生兒轉運呼吸機、新生兒心電監護等多種搶救設備。經過三小時車程，於12點35分在鹽源縣城兩地急救車順利相遇，患兒在鼻導管吸氧下面色青紫，呻吟不止、氣促，呼吸達100+次/分，煩躁不安，SP02 50%，我院醫生立即行氣管插管，予球囊正壓通氣，經過搶救後患兒面色逐漸轉為紅潤，將患兒置於轉運暖箱內，予轉運呼吸機輔助通氣，立即返程。

由於路途遙遠、崎嶇，為避免患兒在暖箱內發生顛簸，醫務人員對患兒進行了妥善的固定。經過3個多小時的翻山越嶺，16點04分，寶寶終於平安轉診到達我院，目前已在新生兒病房進一步檢查治療。

此次跨多縣的遠程新生兒轉運，對我院新生兒轉運系統提出了巨大的挑戰，是涼山州首例長距離、跨多縣帶呼吸機遠程轉運。該次成功的轉運，得益於CMF捐贈的新生兒轉運系統，不僅為患兒提供了最佳的救治方案，更體現了西昌市人民醫院危重新生兒轉運系統的進一步健全及完善，為救治西昌市及周邊偏遠地區的危重新生兒提供了更多的機會。

CELEBRATING 24 YEARS OF SUSTAINABLE PROGRAMS & ACHIEVEMENTS

The Children's Medical Foundation (CMF) helped establish a new pediatric hospital, the Shanghai Children's Medical Center (SCMC), more than 20 years ago. It remains a leading pediatric hospital for the nation today. Since 2000, CMF has focused primarily on neonatal care and established 30 Neonatal Care Units across 12 provinces in China. Focusing on the rural health gap in newborn care, CMF addresses one of the most critical yet least understood challenges facing China and the developing world today, namely the unacceptably high neonatal mortality rate in rural China.

EVERY BABY RESCUED INITIATIVE - SCALING SUSTAINABLE IMPACT

中西部新生兒救治能力建設 – 進一步擴大可持續影響力

May 2019 五月

Every Baby Rescued was developed as a result of the proven success of CMF's Comprehensive Neonatal Healthcare Project (CNHP). Since 2010, CNHP has played a significant role in developing newborn healthcare resources where too often, none previously existed. Every Baby Rescued Initiative carries forward four original program components, while adding County Neonatal Care Unit, a new program bringing newborn intensive care many hours closer to the homes of families.

Pilot of this new program launched at six County Hospitals in Mianyang prefecture, laying the groundwork for hundreds more to follow in the years to come. Aligning with government policies, this program focuses on Healthy China 2030, to reduce infant mortality, the United Nation's Sustainable Development Goal 3.2 and the World Health Organization's Health Systems Strengthening framework.

「中西部新生兒救治能力建設」項目是新生兒綜合救治項目 (CNHP) 取得成功的結果。自 2010 年以來，CNHP 在開發新生兒醫療資源方面發揮了重要作用，然而這些資源以前卻並不存在。「中西部新生兒救治能力建設」繼承了四個原始項目的組成部分，同時亦增加了縣級新生兒護理室。這是我們的新計劃，使新生兒重症監護更接近偏遠地區有急切需要的家庭。

這新項目的試點在四川省綿陽州的六家縣級醫院啟動，為未來數以百計的後續項目奠定了基礎。該項目與「健康中國 2030」，側重於以減少可預防的嬰兒死亡率、聯合國可持續發展目標 3.2 和世界衛生組織的衛生系統強化框架一致。

The Social Impact Fellowship prepares high school students to be socially responsible leaders with the skills and understanding needed to lead impactful personal and professional lives. The program brings together CMF, Yale University's Dwight Hall Socially Responsible Investment (SRI) Fund model, and the Hong Kong business community, to give students hands-on experience and skills development in nonprofit leadership, investment management, and the field of medicine.

From July 1st to 26th, the Fellows spent four weeks inside boardrooms as classroom. CMF's corporate partners and industry professionals in Hong Kong delivered interactive lectures and skills-coaching. Fellows spent a week in China to visit our partner hospitals, program sites and CMF beneficiaries to witness a nonprofit in action.
